which were used for atomic energy purposes, but it did not control all aspects of the atomic energy program. It played a secondary role to the FCD/CM; that is, it prepared materials used in the production of atomic energy and perhaps, materials for construction of power stations and the mining of ore.

4. (25X1)

was in charge of many persons who worked in the FCD. MVD members who work in the FCD are on the MVD reserve list.
